**REASONS FOR ALLOWANCE**

1. The following is an Examiner's statement of reasons for allowance: Claims 1-12 are considered allowable since when reading the claims in light of the specification, as per MPEP § 2111.01 or In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claim including using LAN radios wherein a role-based multicast IP address corresponds to a specific role (defined at e.g., pg. 1, lines 22-29; pg. 3, lines 10-12; pg. 5, lines 15-24).

Although it is well known to assign addresses based on subgroups, it is the examiner's position that one should not misconstrue the term "role" to be the role of a piece of hardware, such as the role of a gateway/access point compared to the role of a client/mobile. Doing so would be in direct contradiction of MPEP 2111.01 where the term role is clearly defined as being the role of a person(s). Generally IP addresses are assigned dynamically to hardware but it also known that it can be done statically. The closest reference of record appears to be the Korus (US 2002/0097718) where addresses are assigned by location (Map I). However, even using a router as performing one role and a client in a subgroup as performing another, one can see that there is an overlap in addresses (Map I). Therefore, the examiner maintains that none of the references of record alone or in combination disclose or suggest

the combination of limitations specified in the independent claim including using LAN radios wherein a role-based multicast IP address corresponds to a specific role.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
